

Dividing by 5 and 6**SKILLS**

Find the missing factor in each multiplication fact. Then use the multiplication fact to find the quotient.

1. $6 \times \underline{\quad} = 24$

$24 \div 6 = \underline{\quad}$

2. $6 \times \underline{\quad} = 42$

$42 \div 6 = \underline{\quad}$

3. $5 \times \underline{\quad} = 30$

$30 \div 5 = \underline{\quad}$

4. $5 \times \underline{\quad} = 35$

$35 \div 5 = \underline{\quad}$

5. $6 \times \underline{\quad} = 6$

$6 \div 6 = \underline{\quad}$

6. $5 \times \underline{\quad} = 20$

$20 \div 5 = \underline{\quad}$

7. $5 \times \underline{\quad} = 10$

$10 \div 5 = \underline{\quad}$

8. $6 \times \underline{\quad} = 18$

$18 \div 6 = \underline{\quad}$

9. $5 \times \underline{\quad} = 15$

$15 \div 5 = \underline{\quad}$

10. $5 \times \underline{\quad} = 25$

$25 \div 5 = \underline{\quad}$

11. $6 \times \underline{\quad} = 12$

$12 \div 6 = \underline{\quad}$

12. $5 \times \underline{\quad} = 40$

$40 \div 5 = \underline{\quad}$

13. $6 \times \underline{\quad} = 36$

$36 \div 6 = \underline{\quad}$

14. $5 \times \underline{\quad} = 45$

$45 \div 5 = \underline{\quad}$

15. $6 \times \underline{\quad} = 48$

$48 \div 6 = \underline{\quad}$

16. $6 \times \underline{\quad} = 54$

$54 \div 6 = \underline{\quad}$

17. $6 \times \underline{\quad} = 30$

$30 \div 6 = \underline{\quad}$

18. $5 \times \underline{\quad} = 5$

$5 \div 5 = \underline{\quad}$

Find each quotient.

19. $10 \div 5 = \underline{\quad}$

20. $12 \div 6 = \underline{\quad}$

21. $45 \div 5 = \underline{\quad}$

22. $18 \div 6 = \underline{\quad}$

23. $25 \div 5 = \underline{\quad}$

24. $48 \div 6 = \underline{\quad}$

25. $15 \div 5 = \underline{\quad}$

26. $36 \div 6 = \underline{\quad}$

27. $20 \div 5 = \underline{\quad}$

28. $42 \div 6 = \underline{\quad}$

29. $30 \div 5 = \underline{\quad}$

30. $54 \div 6 = \underline{\quad}$
