

Dividing by 7 and 8**SKILLS**

Find the missing factor in each multiplication fact. Then use the multiplication fact to find the quotient.

1. $8 \times \underline{\quad} = 40$

$40 \div 8 = \underline{\quad}$

2. $7 \times \underline{\quad} = 7$

$7 \div 7 = \underline{\quad}$

3. $7 \times \underline{\quad} = 49$

$49 \div 7 = \underline{\quad}$

4. $8 \times \underline{\quad} = 16$

$16 \div 8 = \underline{\quad}$

5. $8 \times \underline{\quad} = 48$

$48 \div 8 = \underline{\quad}$

6. $7 \times \underline{\quad} = 42$

$42 \div 7 = \underline{\quad}$

7. $8 \times \underline{\quad} = 56$

$56 \div 8 = \underline{\quad}$

8. $7 \times \underline{\quad} = 63$

$63 \div 7 = \underline{\quad}$

9. $7 \times \underline{\quad} = 56$

$56 \div 7 = \underline{\quad}$

10. $7 \times \underline{\quad} = 28$

$28 \div 7 = \underline{\quad}$

11. $8 \times \underline{\quad} = 32$

$32 \div 8 = \underline{\quad}$

12. $8 \times \underline{\quad} = 64$

$64 \div 8 = \underline{\quad}$

13. $8 \times \underline{\quad} = 24$

$24 \div 8 = \underline{\quad}$

14. $7 \times \underline{\quad} = 21$

$21 \div 7 = \underline{\quad}$

15. $7 \times \underline{\quad} = 35$

$35 \div 7 = \underline{\quad}$

16. $7 \times \underline{\quad} = 14$

$14 \div 7 = \underline{\quad}$

17. $8 \times \underline{\quad} = 72$

$72 \div 8 = \underline{\quad}$

18. $8 \times \underline{\quad} = 8$

$8 \div 8 = \underline{\quad}$

Find each quotient.

19. $14 \div 7 = \underline{\quad}$

20. $21 \div 7 = \underline{\quad}$

21. $24 \div 8 = \underline{\quad}$

22. $48 \div 8 = \underline{\quad}$

23. $56 \div 7 = \underline{\quad}$

24. $42 \div 7 = \underline{\quad}$

25. $64 \div 8 = \underline{\quad}$

26. $32 \div 8 = \underline{\quad}$

27. $35 \div 7 = \underline{\quad}$

28. $28 \div 7 = \underline{\quad}$

29. $16 \div 8 = \underline{\quad}$

30. $56 \div 8 = \underline{\quad}$

31. $63 \div 7 = \underline{\quad}$

32. $49 \div 7 = \underline{\quad}$

33. $40 \div 8 = \underline{\quad}$

34. $72 \div 8 = \underline{\quad}$
